Harmonized Tariff Schedule of the United States Revision 7 (2025)

Annotated for Statistical Reporting Purposes

CHAPTER 73

ARTICLES OF IRON OR STEEL

XV 73-1

Notes

- 1. In this chapter the expression "cast iron" applies to products obtained by casting in which iron predominates by weight over each of the other elements and which do not comply with the chemical composition of steel as defined in Note 1(d) to chapter 72.
- 2. In this chapter the word "wire" means hot- or cold-formed products of any cross-sectional shape, of which no cross-sectional dimension exceeds 16 mm.

Additional U.S. Notes

- 1. For the purposes of heading 7304 or 7306, the rate of duty "Free (C)" appearing in the "Special" subcolumn applies only to tubes and pipes with attached fittings, suitable for conducting gases or liquids.
- 2. For the purposes of subheading 7307.19.30, the expression "ductile fittings" refers to fittings which contain over 2.5 percent carbon and over 0.02 percent of magnesium or of magnesium and cerium, by weight.

Statistical Note

For the purposes of statistical reporting numbers 7310.10.0005, 7310.29.0020 and 7310.29.0055, "refillable stainless steel kegs,
whether or not pressurized" refers to cylindrical kegs for liquid beverages, each keg with a domed top and bottom and a single
neck piece, designed for a coupler (valve) system and an extractor tube (spear) by which the keg can be cleaned, filled and
dispense the liquid contents.
